ERA-NET Cofund

Purpose of ERA-NET Cofund and difference from the former ERA-NET and ERA-NET Plus actions

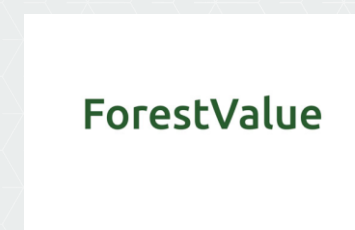

ERA-NET Cofund under Horizon 2020 is a type of programme co-fund action designed to support **public-public partnerships (P2Ps)**, including joint programming initiatives between Member States, in their preparation, establishment of networking structures, design, implementation and coordination of joint activities as well as Union topping-up of a trans-national call for proposals. It merges the former ERA-NET and ERA-NET Plus into a single instrument with the central and **compulsory element of implementing one substantial call** with top-up funding from the Commission. The focus of ERA-NETs is therefore shifting from the funding of networks to the top-up funding of single joint calls for transnational research and innovation in selected areas with high European added value and relevance for Horizon 2020. This aims at increasing substantially the share of funding that Member States dedicate jointly to challenge driven research and innovation agendas.

ERA-NETs based on Coordination and Support Action (CSA) are no longer possible. Only in exceptional cases it might be considered to support the preparation and structuring of specific emerging P2Ps that demonstrate clear
