### Ukrepi, ki bodo uvedeni februarja 2025:

Menza na Reaktorju ima nekoliko drugačen način delovanja. Zaradi majhnega števila rednih uporabnikov, zanimanja ponudnikov za vzpostavitev klasične menze (kuhanje na lokaciji) ni bilo. Kot edina možnost vzpostavitev organizirane ponudbe prehrane se je izkazal sistem predhodnega naročanja hrane. To pomeni, da hrana ni pripravljena direktno na lokaciji, temveč jo zunanjji ponudnik pripravi v svojih prostorih in jo na lokaciji IJS Reaktor le razdeli. Predhodno naročanje je nujno za ekonomičnost poslovanja in preprečevanje presežne hrane. *The canteen at Reactor has a slightly different way of operating. Due to the small number of regular users, there was no interest from providers in operating a classic canteen (cooking on site). The only option for establishing an organized food offer was a system of pre-ordering food. The food is not prepared directly on site, but is prepared by an external provider in its own premises and only distributed at the IJS Reactor location. Pre-ordering is essential for the economy of operations and the prevention of excess food.*

- V ceno dnevne ponudbe bo vključena tudi dnevna juha. *The soup will be included in the price of the daily offer.*
- Kot dodatna ponudba bo, brez predhodnega naročanja, na voljo solatni krožnik (s piščancem ali s feta sirom). *As an additional offer, a salad plate (with chicken or feta cheese) will be available without prior ordering.*
- Za vse, ki ste se pozabili naročiti na dnevno ponudbo, je že do sedaj obstajala možnost dodatne ponudbe po naročilu (npr. ocvrt sir, krompirček, zelenjavni polpet ipd.). Ponudba je navedena na oglasni tabli v prostorih menze. Od 1.2.2025 bo dodatna ponudba na voljo po enaki ceni kot dnevno mesno kosilo. *For those who forgot to pre-order the daily lunch, there was already the option of an additional offer to order on-site (e.g. fried cheese, fries, vegetable patty, etc.). The offer is listed on the noticeboard in the canteen. From 1.2.2025, the additional offer will be available at the same price as the daily meat lunch.*
- Ura za oddajo dnevnega naročila kosil se podaljša do 9. ure. *The time for placing a daily lunch order will be extended to 9 am.*
- V primeru napovedanih skupin, bo ura kosila skupine vpisana v on-line jedilnik. To vam bo omogočilo, da prilagodite vaš čas odmora in se izognite gneči. *In the case of announced groups, the group's lunch time will be published in the online menu. This will allow you to adjust your break time and avoid crowds.*
- V toplejših mesecih so vedno na voljo sedešča na terasi. *In the warmer months, seats on the terrace are always available.*
- Ponudnik bo, v okviru zanesljivosti dobaviteljev, stremel k objavi jedilnika za prihodnji teden v petek dopoldne. *The provider will, within the framework of the reliability of suppliers, strive to publish the menu for the following week on Friday morning.*
- Skupaj s ponudnikom se bomo potrudili poiskati rešitev, ki bo omogočala organizirano prehrano tudi v času kolektivnih dopustov ponudnika. *Together with the provider, we will try*

*to find a solution that will enable organized meals even during the provider's collective holidays.*

- V želji izboljšanja ambienta in počutja uporabnikov menze, sta obnova prostora in nakup novega pohištva uvrščena v plan investicij za leto 2025. *In order to improve the ambiance and well-being of the canteen users, the renovation of the space and the purchase of new furniture are included in the investment plan for 2025.*
