

*Institut Jožef Stefan, Odsek za avtomatiko, biokibernetiko in robotiko  
išče nove raziskovalce*

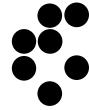

**magistre inženirje strojništva ali mehatronike (ž/m)  
za raziskovalno-razvojno delo na projektu na področju**

## **TOVARN PRIHODNOSTI, ROBOTIKE IN AVTOMATIZACIJE.**

Od kandidatov, ki se imajo namen nadalje izpopolnjevati (doktorat), pričakujemo inovativno, vestno, strokovno in samostojno delo na zadanih znanstveno raziskovalnih nalogah v tesnem sodelovanju z industrijo. Za izbrane kandidate bo pripravljen podrobni raziskovalni program glede na njihov interes in sposobnost. Delo in raziskave bodo potekale v sodelovanju z doc. dr. Igorjem Kovačem in v sodelovanju s tujimi in domačimi raziskovalci iz razvojno-raziskovalnih organizacij in industrije. Za navedeno delovno mesto se pričakujejo znanja s področja poslovnega managementa, avtomatizacije in mehatronike, zaželjena pa so dodatna znanja s področja uporabe programske opreme za planiranje proizvodnih procesov. Pogodba bo sprva omejena na eno leto z možnostjo podaljšanja po uspešno zaključenem prvem letu.

Če vam opisano delo predstavlja izviv in ga želite opravljati v našem laboratoriju, se s prošnjo (do ene strani) prijavite na zgoraj navedeno delovno mesto, priložite življenjepis (z bibliografijo), skenirane dokaze o doseženi stopnji izobrazbe in zaključeni diplomi ozirama magisteriju. V prošnji navedite vaše kontaktne podatke ter vse skupaj pošljite na naslov [igor.kovac@ijs.si](mailto:igor.kovac@ijs.si). Vloge bomo obravnavali do zasedenosti delovnega mesta, v vrstnem redu kot jih bomo prejeli. Izbrani kandidati bodo z delom na IJS lahko začeli takoj, ko bodo zaključene vse administrativne formalnosti glede zaposlitve.

*Jožef Stefan Institute, Department for Automation, Biocybernetics and Robotics  
is looking for new researchers,*

**graduate masters of science for mechanical or mechatronic engineering (f/m)**

*for the research and development work on the field of*

## **FACTORIES OF THE FUTURE, ROBOTICS and AUTOMATION.**

From candidates, who intend to continue study on a PhD level, we expect innovative, conscientious, professional and independent work on the set of scientific research projects in close collaboration with industry. For the successful candidate precise research program will be defined, based on his interests and abilities. The research work will be conducted in close cooperation with ass. prof. Igor Kovač and with other international staff of researchers, who work in a team, as well as with leading domestic industry. The knowledge on intelligent business management, automation and mechatronics is required, with possible additional skills in the use of software tools for process planning systems. The initial contract will be at the beginning limited to one year with the possibility to extend it after one year.

To apply, you should send a statement of motivation related to above topic (up to one page), a curriculum vitae (with bibliography), scanned transcripts of grades and diplomas or master thesis, and contact information to [igor.kovac@ijs.si](mailto:igor.kovac@ijs.si). Applications will be evaluated as they are received, until position is filled. Successful candidate can start working at JSI as soon as all the paper work is completed.
